

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) An apparatus for fixing a connector for an airbag module, comprising:

 a connector ~~for supplying~~ that supplies an electric current to an airbag module including an airbag case;

 a clip integrally formed with the connector in such a manner that the clip is protruded from the connector, the clip having an insertion opening formed therethrough and a hook ~~protruded toward~~ protruding into the insertion opening; and

 a connector bracket attached to the airbag case, the connector bracket being inserted in the insertion opening of the clip and having an engagement hole ~~formed~~ provided at one side thereof so that the hook of the clip is engaged in the engagement hole.

2. (Currently Amended) The apparatus as set forth in claim 1, wherein the connector bracket comprises:

 a supporting part attached to the airbag case ~~for supporting~~ to support the connector;

a holding part vertically extended from the supporting part; and
an inserting part vertically formed provided at one end of the holding part
so that the inserting part is inserted into the insertion opening of the clip, the
inserting part having the engagement hole formed provided therein.

3. (Currently Amended) The apparatus as set forth in claim 2,

wherein the airbag case comprises: an airbag housing for accommodating
that accommodates the airbag; and a can housing for accommodating that
accommodates an inflator supplying , which supplies gas so that the airbag is
expanded when a collision occurs, and

wherein the connector bracket is mounted to the rear surface of the can
housing.

4. (Original) The apparatus as set forth in claim 3, wherein the connector bracket
has a mounting bracket formed integrally therewith, the mounting bracket being
mounted to the rear surface of the can housing and fixed to the body of a car.

5. (Currently Amended) The apparatus as set forth in claim 2,

wherein the airbag case comprises: an airbag housing for accommodating
that accommodates the airbag; and a can housing for accommodating that
accommodates an inflator supplying , which supplies gas so that the airbag is
expanded when a collision occurs, and

wherein the connector bracket is mounted to a side surface of the can housing opposite to the airbag housing.

6. (Currently Amended) The apparatus as set forth in claim 5, wherein the connector bracket has a supporting part, the supporting part of the connector bracket ~~being formed~~ is provided in such a manner that a connector supporting region of the supporting part is disposed at a position higher than that of a region attached to the side surface of the can housing so that the connector supporting region of the supporting part is connected to the region attached to the side surface of the can housing in the shape of ~~steps~~ a step with a predetermined height in the direction in which the connector supporting region of the supporting part is away from the can housing.
